Dear Ms. Whittington:

I wanted to let the EPA know that I am still opposed to your proposed clean-up of the Love landfill. I do not understand why you want to spend so many millions of dollars and risk all jobs when you have agreed there is no risk now at the site.

Why not wait until there is some risk at the ~~site~~ site before spending all of that money? The Engineering-Science proposal makes the most sense. The capping will keep the waste from moving and the groundwater monitoring will let you know if there is ever a problem in the future. Please let us decide what is best for ourselves. It's our land and our future.

Sincerely,

Allison Scudder
